

METADATA CODEBOOK

Variable Name	Variable Description	Values
Observed	Human milk microbiome (HMM) Observed Richness. Calculated using “vegan” package on rarefied count data. See manuscript for detailed methods.	Numeric continuous
Shannon	HMM Shannon Diversity. Calculated using “vegan” package on rarefied count data. See manuscript for detailed methods.	Numeric continuous
shannon_evenness	HMM Shannon Evenness. Calculated using “vegan” package on rarefied count data. See manuscript for detailed methods.	Numeric continuous
zbouts30	Z-score transformed number of breastfeeding bouts. See manuscript for detailed methods.	Numeric continuous
zmomnursew	Z-score transformed total time breastfeeding, after winsorizing an outlier. See manuscript for detailed methods.	Numeric continuous
zf_allophyscon	Z-score transformed allmother physical contact frequency. See manuscript for detailed methods.	Numeric continuous
infecorichnessnh	Infant non-household caregiving network richness. See manuscript for detailed methods.	Numeric integer
workoutsidehome	Maternal work outside the home. See manuscript for detailed methods.	Binary: 0=No 1=Yes
agemos	Infant age in months.	Numeric continuous
agedays	Infant age in days (originally reported unit).	Numeric integer
momnurse60w	Total time breastfeeding (minutes) after winsorizing an outlier. See manuscript for detailed methods.	Numeric integer
bouts30	Number of breastfeeding bouts. See manuscript for detailed methods.	Numeric integer
momage2	Maternal age (years).	Numeric integer
f_allophyscon	Frequency of allomother physical contact with infant. See manuscript for detailed methods.	Numeric integer

momnursew	Total time breastfeeding (every 30 seconds, originally reported unit) after winsorizing an outlier. See manuscript for detailed methods.	Numeric integer
zmomnursecutw	Total time breastfeeding divided into groups by z-score. See manuscript for detailed methods.	Factor: Low, <-1 SD Medium [-1,1] SD High, >1 SD
zbouts30cut	Number of breastfeeding bouts divided into groups by z-score. See manuscript for detailed methods.	Factor: Low, <-1 SD Medium [-1,1] SD High, >1 SD
ID	Participant ID. <u>Note: this is a randomly generated ID for this replication dataset</u> and may not match other datasets uploaded from this study. If using multiple datasets from this study (MIMBES), contact dataset authors for guidance.	Character
